# ABOUT US

Established in 1994, PT Adimas Isolositama is a company that specializes in building insulation, air conditioning, and industrial needs. As we provide solutions for insulation products, we are committed to provide the best quality products, competitive prices, and after sales service for customers.

With more than 25 years of experiences, PT Adimas Isolositama holds the trust as an official sole distributor and as an agent chosen from the best insulation products. PT Adimas Isolositama also applies strict product selection, and ensures that manufacturing and procurement of brands that passes industry standards. PT Adimas Isolositama's products are manufactured using the latest technology and proven quality standards - including international specification requirements for your long-term investment.

In order to ensure the best quality and best end results, PT Adimas Isolositama provides a comprehensive service to give a complete functional solution. We are supported by a professional and experienced team, from line consultation to after-sales service. We care about every need of your projects that require a personal touch.

Based on our principles, responsibility and trust for all scales of business in various sectors, PT Adimas Isolositama is ready to be a business partner in every business step.

## VISION

▶ To be the chosen partner in insulation solution covering all scaled and industrials sectors based on the safety and comfort of many people; present as top of mind especially for the provision of high performance and more efficient insulation products in the long term.

## MISSION

▶ Bringing revolution in the field of insulation with innovative and technology-based breakthroughs and solutions.

▶ Responding to the challenges of building insulation needs (commercial and industrial) which are energy efficient, environmentally friendly and safe for consumers.

▶ Providing better value for benefits in terms of products and services for the sake of total customer convenience.

# ALL PRODUCTS

Copper Tube from MXR is pipe for air conditioning and has high temperature and pressure resistance with ASTM International Standards.

Insulation made from Nitrile Butadiene Rubber (NBR) synthetic rubber that has been certified Class "1", Class "0", and FM Approved which is fire resistant.

Consists of Copper Coil, Straight Tube, and Pre Insulated Copper Coil for the needs of air conditioning, water, gas pipes and others.

BJLS or Lokfom Zinc Coated Steel is galvanized, hence it is strong, flexible and does not rust.

Provides flexible aluminum and diffusers for all HVAC and ducting needs.

The Polypropylene Random (PP-R) pipe is made from stronger material which is resistant to water at various temperatures and pressures.

Glasswool made of Fiberglass which is light & flexible, used for insulation layers in buildings.

Rockwool made from mineral wool & rock elements suitable for sound and heat insulation in buildings.

Aluminum Foil is an effective insulating paper to reflect the sun's heat on the roof.

Pre Insulated Aluminum Duct made of Polyisocyanurate (PIR) which is lightweight and safe for air conditioning ducts and normal air ducts.

Insulation made from Polyolefin foam which has fire resistance with international standard Class "0".

Copper Fitting For ASTM B280

Accessories and fittings for copper pipes so that the flow can be adjusted to your needs.

Roofmesh or wire mesh serves as a basic frame in the installation of insulation and building materials, with sturdy and durable materials.

Aluminum Tape has resistance to heat and cold with a strong adhesive.

Bubble Woven Foil is a double-sided aluminum attached to a bubble plastic reinforced woven material.

Woven Foil is useful for reflecting the sun's heat on the roof to lower the temperature under the roof.

Thermal Foil is a double-sided aluminum attached to Polyethylene (PE) foam and coated with a woven material.

Glasscloth is a fire-resistant fabric to hold Glasswool or Rockwool material to make it neater and tighter.

AB Coat Flinkote is an adhesive substance that can also be used as a ducting glue, leak-proof coating paint, anti-rust, and filler for cracks on surfaces.

Spindle Pins or special nails used for Glasswool or Rockwool as a strong anchor.

Honeywell contains Freon which is used to refill the air conditioner to lower the temperature and cool down.

Control Valve is used to make it easier to adjust the flow of water in an HVAC system.

Black iron pipe and galvanized iron pipe have corrosion resistance, heat resistance and rust resistance making them suitable for industry.

# INDUSTRIAL SCOPE

**AC DUCTING  
AND FRESH AIR**

**PIPE CHILLER/JACKETING**

**AC AND  
COOLING SYSTEM**

**ROOFING AND  
WALL/CLADDING**

**PARTITION**

**PLUMBING AND DRAIN**

**GENERATOR**

**EXHAUST**
